Senior Frontend Developer

Description

Are you looking for a job with a good and appreciative working atmosphere and an open, humorous team? Absolutely flexible working hours? Promote your further development? You're in luck – we are currently expanding our enthusiastic team. Who we are? We are global leaders in the analysis and optimization of IT environments for all aspects of collaboration and communication.

Due to the growth of our Microsoft product range, we are looking for an highly motivated and experienced

Senior Frontend Developer (f/m/x)

to join our **development team in Vienna** focusing on our Microsoft M365 analytics solutions.

As a member of the team, you will

- Design, implement, and maintain the web frontend of our cloud- and appliance based applications
- Write fast, robust, and maintainable code that scales well
- Continuously work to improve performance and stability
- Participate in backlog refinements to add technical details to tasks and user stories
- Work with the rest of the dev team and product management to build software that delivers value to customers

We'd love to talk to you if you

- Have at least five years of professional work experience
- Are a passionate and well-rounded software developer
- Enjoy coding with Java Script (ES6 advantageous), HTML5, and CSS, and are experienced in using react.js, Node.js, and Express.js
- Have some know-how about working with databases
- Have excellent verbal and written skills in English and German
- Have good team skills, but are able to work independently

Also good are

- Experience with a module bundling tool such as webpack
- Experience with UI Frameworks such as Bootstrap. Material Design etc. is an advantage
